2D ECHO AND COLOUR DOPPLER

Patient Name	**: Mr. Harish Chandra Gupta**	Accession No.	: OH-ECHO-26-1022
Age / Sex	: 74 Y / Male	Modality	: Echocardiography
Patient ID	: GMS-10232	Study Date	: 10/10/2026
Referred By	: Dr. Ananya Rao	Reported	: 10/10/2026 01:30 PM

INDICATION

Follow-up of LV function in HFrEF with atrial fibrillation.

MEASUREMENTS

LVIDd 60 mm, LVIDs 50 mm, IVS 9 mm, PW 9 mm. LA 48 mm (dilated). Aortic root 31 mm. TAPSE 16 mm.

FINDINGS

Dilated left ventricle with global hypokinesia. LVEF by biplane Simpson's 35 % (previously 30 %). Grade II diastolic dysfunction cannot be assessed in AF. Moderate functional mitral regurgitation. Mild tricuspid regurgitation; RVSP 38 mmHg. IVC 18 mm with more than 50 % collapse. No pericardial effusion, no clot.

IMPRESSION

1. **Dilated cardiomyopathy picture with LVEF 35 % — mild improvement on treatment.**
2. **Moderate functional MR; mild pulmonary hypertension (RVSP 38 mmHg).**
3. **Severely dilated left atrium; rhythm atrial fibrillation during study.**

Kindly correlate clinically. Not valid for medico-legal purposes.
