GMS Eye Clinic - Ophthalmology Consultation Note

Chief Complaint: Blurry vision and mild eye discomfort, both eyes, for two weeks

Assessment: Visual acuity 20/30 OD, 20/25 OS. Mild dry eye surface changes noted on slit-lamp exam. No evidence of acute infection or significant structural abnormality. Symptoms consistent with mild dry eye syndrome.

Plan: Trial of preservative-free artificial tears four times daily. Follow up in six weeks if symptoms persist or worsen.
