DISCHARGE SUMMARY

Patient Name	**: Mr. Ramesh Patil**	IPD No.	: IP/26/09/1774
Age / Sex	: 57 Y / Male	Department	: General Medicine
UHID	: LCM-10243	Admitted	: 21/09/2026 07:30 PM
Consultant	: Dr. Mahesh Bhamre, MD (Medicine)	Discharged	: 28/09/2026 12:00 PM

FINAL DIAGNOSIS

- **COVID-19 viral pneumonia, moderate (CT severity 12/25)**
- **Type 2 diabetes mellitus with steroid-induced hyperglycaemia**
- **Hypertension**

COURSE IN HOSPITAL

Required oxygen 2-4 L/min for 4 days. Treated with dexamethasone 6 mg daily for 7 days, enoxaparin prophylaxis and insulin for steroid-induced hyperglycaemia. Weaned off oxygen on day 6. SpO2 95 % on room air at rest, 92 % after a 6-minute walk.

KEY INVESTIGATIONS

CRP	**84**	mg/L	< 6
Ferritin	**812**	ng/mL	30 - 400
D-dimer	**0.9**	µg/mL FEU	< 0.5
Total Leucocyte Count	**6.2**	10^3/µL	4.0 - 11.0
HbA1c	**8.3**	%	4.0 - 5.6

MEDICINES ON DISCHARGE

Medicine	Dose	When	Duration
1. Tab. Wysolone 10 mg	1 tab	Morning after breakfast	Taper: 10 mg x 7 days, 5 mg x 7 days, stop
2. Tab. Glycomet 500 mg	1 tab	Twice daily	Continue
3. Tab. Amlong 5 mg	1 tab	Morning	Continue
4. Tab. Pan 40 mg	1 tab	Before breakfast	While on steroid

ADVICE ON DISCHARGE

- Check sugar twice daily while on steroid
- Breathing exercises and gradual walking
- Seek care if SpO2 falls below 93 %

FOLLOW-UP

Physician review after 2 weeks; repeat chest imaging after 3 months if still breathless.
