SPIROMETRY WITH BRONCHODILATOR REVERSIBILITY

Patient Name	**: Ms. Ananya Bose**	Accession No.	: BE-PFT-26-0714
Age / Sex	: 26 Y / Female	Modality	: Spirometry
Patient ID	: LCM-10242	Study Date	: 14/07/2026
Referred By	: Dr. Ananya Rao	Reported	: 14/07/2026 01:30 PM

TECHNIQUE

ATS/ERS acceptable manoeuvres; 3 reproducible efforts. Salbutamol 400 mcg via spacer, repeat after 15 minutes.

RESULTS (PRE)

FEV1 2.06 L (72 % predicted), FVC 3.18 L (93 %), FEV1/FVC 0.65. PEF 5.1 L/s (68 %).

RESULTS (POST)

FEV1 2.41 L (+17 %, +350 mL), FVC 3.30 L, FEV1/FVC 0.73.

IMPRESSION

1. Moderate obstructive ventilatory defect with significant bronchodilator reversibility — consistent with asthma.

Kindly correlate clinically. Not valid for medico-legal purposes.

Dr. Farhan Ali
MD (Pulmonary Medicine), Consultant Chest Physician
